

CHARACTERS OF THE RAINFOREST WORKSHEET

DEFINITIONS

MAMMALS - vertebrates (that means ‘animals with a backbone’) that are warm-blooded and require air to breathe.

BIRDS - vertebrates (that means ‘animals with a backbone’) that are warm-blooded and require air to breathe. They also have feathers, wings and a beak.

FORESTS - an area of land mostly covered by trees.

RAINFORESTS - an area of land mostly covered by trees, that is mostly warm, and where it rains A LOT!

FUN FACTS

- All **birds** have wings and feathers, but not all birds can fly.
- All **mammals** produce milk to feed their young.
- The Galloway Forest Park in Scotland is the largest **forest** in all of the UK.
- There are 10 major **rainforests** in the world.

ACTIVITY ONE

Looking at the pictures, can you tell which is a **forest** and which is a **rainforest**? Circle the right answer.

Forest / Rainforest

Forest / Rainforest

Forest / Rainforest

Forest / Rainforest

ACTIVITY TWO

Draw a line to match each animal to the right label - is it a **mammal** or a **bird**?

MAMMAL

BIRD

ACTIVITY THREE

Read the list of body parts, and circle the ones a bird usually has.

Now put those body parts together, and draw any kind of bird you like in the box!

Finish the sentence that the zookeeper taught you on the tour – Do you remember?

Say it NICE & LOUD!

By recycling at home we can all help SAVE THE

_____!
